Professional Summary

Motivated and passionate Computer Science undergraduate with hands-on experience in full-stack web development. Experienced in designing and developing real-world applications from concept to deployment, including a job marketplace platform (WorkzUp). Skilled in modern technologies such as Next.js, TypeScript, and PostgreSQL, with experience in authentication, database management, and API integration. Strong team player with a keen interest in building scalable applications and continuously improving technical skills.

Core Competencies

- | | | |
|----------------------------------|-----------------------------------|------------------------------|
| • JavaScript, TypeScript, Python | • UI/UX Design, Responsive Design | • Payment Gateway (PayHere) |
| • Next.js, React, Tailwind CSS | • Performance Optimization | • Full Stack Web Development |
| • Node.js, Express | • Git, GitHub | • VS Code, Postman |
| • PostgreSQL, Prisma | • Deployment (Vercel, Railway) | • Figma (Basic) |
| • REST APIs | • Environment Configuration | • Agile, ClickUp |
| • Authentication & Authorization | • Debugging & Problem Solving | • Agile & Team Collaboration |

PROJECTS

WorkzUp – Job Marketplace Platform (Team Project – Full Stack Developer)

2026

- Developed a full-stack platform connecting job seekers and recruiters
- Implemented secure authentication and role-based access control
- Built job posting, application, and real-time messaging features
- Integrated PayHere payment gateway for job posting payments
- Designed responsive and user-friendly UI for better user experience
- Optimized API calls and database queries to improve performance
- Implemented form validation and error handling to ensure data accuracy and reliability
- Managed state and data flow efficiently across components
- Deployed using Vercel (frontend) and Railway (backend) with environment configuration
- Tested and debugged features to improve system stability and usability
- Collaborated in a team using Git and Agile practices, contributing to feature development and integration
- Structured backend APIs to ensure efficient communication between frontend and database

Tech Stack: Next.js, TypeScript, PostgreSQL, Prisma

WaffleHut – Animated Waffle Shop Landing Page (Frontend Developer)

2026

- Developed a cartoon-style animated waffle shop landing page using Next.js and Tailwind CSS
- Implemented scroll-controlled PNG sequence animations using HTML5 Canvas and GSAP ScrollTrigger
- Designed responsive modern UI with playful dessert-themed branding and smooth animations
- Built cinematic scrollytelling sections with Framer Motion and interactive transitions
- Optimized image preloading and rendering performance for smooth user experience
- Created custom animated components and mobile-friendly layouts

Tech Stack: Next.js, React, Tailwind CSS, Framer Motion, GSAP, TypeScript, HTML5 Canvas

Portfolio Website / Personal Project (Frontend Developer)	2026
• Developed a responsive personal portfolio to showcase projects and skills • Built reusable UI components using modern frontend practices • Designed clean and user-friendly interface for better user experience • Optimized performance and ensured smooth navigation • Deployed using Vercel for reliable hosting Tech Stack: Next.js, Tailwind CSS	
Band Practice Booking System – Web Application (Full Stack Developer)	2026
• Developed a web app to schedule music studio practice sessions and manage band availability • Implemented weekly availability tracking to identify common free time slots • Built booking system and cost calculation feature to split practice fees among members • Designed responsive UI and integrated backend with database Tech Stack: Next.js, TypeScript, PostgreSQL, Prisma	
Guitar Guide – Learning & Reference Web Platform (Frontend Developer)	2026
• Developed a responsive web platform for learning guitar fundamentals and exploring guitar types and techniques • Designed clean and user-friendly UI with structured navigation for better user experience • Built reusable components using modern frontend practices Tech Stack: Next.js, TypeScript, Tailwind CSS	

Education	
BSc (Hons) Computer Science	Jan 2025 - Present
Informatics Institute of Technology (IIT), Affiliated with University of Westminster, UK	
G.C.E. A/L (Biological Science)	Jan 2016 - Dec 2024
Ananda College, Colombo, Sri Lanka	

Key Achievements	
• Leader and Music Director of IIT band “Backline”, directing performances, coordinating team members, and managing musical arrangements • Finalist of StageCraft 2026 (IIT), showcasing performance excellence and effective team collaboration • Music Director of Ananda College (2019, 2020, 2023), leading band activities, organizing performances, and contributing to musical development across multiple years • Participated in sports and e-sports competitions, showcasing teamwork, focus, and competitive performance	

Additional Information	
• Languages: English, Sinhala
